

Avatar: 3d Collectors Vault

Literally and figuratively, Pandora is a long, long way from mother Earth. Its distance of 4.37 light years is so far that humans traveling there are put into cryosleep for the journey in a spacecraft so fast that it could reach the Earth's moon in two seconds. Located in the Alpha Centauri star system, Pandora is a moon that orbits the gas-giant planet Polyphemus. Its environment is beautiful and wild but often hostile to humans, who must wear an exopack to breathe safely in its carbon dioxide-rich atmosphere. As you make your way through James Cameron's Avatar Collector's Vault 3D, you will journey through stunning terrain that few human eyes have seen the world of the Na'vi, the 10-foot-tall blue-skinned humanoids who inhabit Pandora. They have a mystical connection to Pandora's natural world, which they believe to be nurtured by and inextricably bound with Eywa, the goddess of life they worship. Enjoy natural wonders like the floating Hallelujah Mountains and Pandora's natural bioluminescence. View the moon's amazing creatures, ranging from the gentle, spirit-powered woodsprite to fearsome predators such as the thanator and the great flying leonopteryx. This interactive scrapbook also contains 3D glasses to further enhance your viewing experience, plus 3D Pandora removable profiles. If you are inspired by the awesome beauty of Pandora, James Cameron's Avatar Collector's Vault 3D is for you!
