

Accidental Occidental: Economics and Culture of Transition in Mitteleuropa, the Baltic and the Balkan Area

Lajos Bokros is a prominent academic economist and an extremely experienced practitioner of fiscal and market reforms, not only in his native Hungary but also - as an advisor - in many other transition countries. This rare combination of skills has allowed him to write a very interesting book, based on a massive knowledge and a clear analysis. I recommend it not only to the readers in the post-socialist countries but also to those in the West as his book contains important lessons about the value of free markets and the dangers of statism. Leszek Balcerowicz, Warsaw School of Economics --Leszek Balcerowicz, Warsaw School of Economics
