

Carving an American Eagle: With Paul White (Schiffer Book for Woodcarvers)

During the early years of the nation, the eagle was adopted as the symbol of America. From that time to this it has been a favorite subject of carvers. It has adorned buildings, signs, furniture, and boats. It has carried banners of E. Pluribus Unum and Happy New Year. And it is cherished still. In this new book Paul White takes the carver through the process of carving a large traditional bald eagle. Beginning with the gluing of the boards and sculpting and ending with a helpful description of gold leafing, Paul explains each step in detail. For those who wish to get right to the carving he also explains the use of commercially prepared blanks. A measured drawing of the project is included, as well as a gallery of variations. A wonderful book for carvers of all abilities.
